

imc My Digital School

Why digital lessons at all?

Mobile devices have become indispensable for children

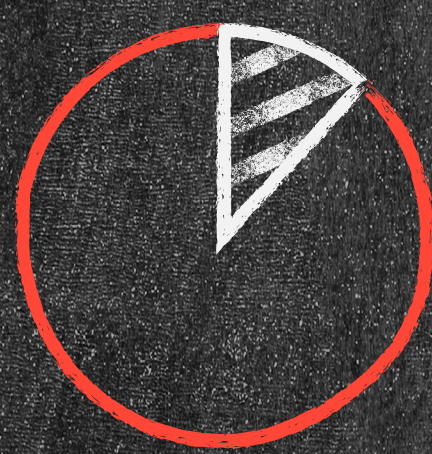

54%

of 10–11-year-olds own a smartphone, in the group 12–13 years, it is already **73%**

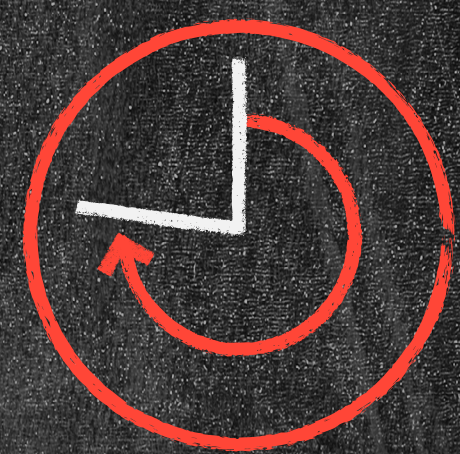

94%

of 10–15-year-olds are daily online

88%

of 10–18-year-olds use smartphones primarily to listen to music or watch videos

46 min

46 minutes on average every day, are 6–13-year-olds online

What are the advantages of digital education for children?

Security

Media skills are learned in a protected space

Speed

Children can use the right tools and learn at their own pace

Balance

Even introverted pupils can easily participate in lessons

What are the advantages of digital teaching for teachers?

”

We try to use digital media whenever it makes sense and enriches the lessons

Dr. Anette Dragan, Principal of the Montessori Community School in Friedrichsthal

1

Holistic

Better overview about individual learning progress and targeted support

2

Flexibility

Flexible adaptation and provision of teaching materials

3

Automatization

Vocabulary tests or arithmetic tasks can be automated, e.g. via quizzes and are corrected automatically

To have an optimal use of digital teaching, a central learning platform is ideal. All curricula and learning content can be set and managed there. This creates an ideal link between the analog and digital world.
